Professional Summary -- <https://cardinal-dev.netlify.app/>

A software developer with a strong interest in designing, developing, and implementing robust and scalable solutions that drive efficiency and innovation. I have experience completing freelance projects that demonstrate my ability to work independently, a keen eye for design and a passion for crafting seamless user experience. Dedicated to staying current with industry trends and continuously enhancing skills to solve complex challenges in the ever-evolving technology landscape.

Experience

Freelance Frontend Developer

February 2023 – Till date

- Implementing UI designs according to client specifications using technologies such as HTML CSS, TailwindCSS, JavaScript, React and Angular including making calls to APIs.
- Converting UI designs to highly interactive software to produce great user experience.
- Resolving technical challenges of moderate complexity and providing effective solutions.
- Independently delivering incremental enhancements.
- Effective collaboration with design teams to deliver aesthetically appealing and feature rich products.

Technical Skills and Competencies

- Proficient in basic web design using Figma.
- Full Stack Web app development using JavaScript, ReactJs, NodeJS, expressJS and Angular.
- Proficient in the use of Microsoft Office tools, such as Word, Excel, and PowerPoint.
- Superb computer system analysis and design skills in the current methodologies.
- Frontend web application development using HTML, CSS, JavaScript, Angular, and React.
- Skillful in web API development using and node.js (express).

Soft Skills

- Effective communication skills
- Ability to work in a dynamic team
- Exceptional problem-solving skills
- Ability to work under pressure
- Self-motivated and result-driven
- Effective Planning and time management skills

Projects

Cardinal Homes

Cardinal Homes is a feature rich and highly interactive real-estate website that allows clients to search the properties they want to rent or buy based on a number of criteria such as location, facilities and price. It also allows them see pictures of their selected property from different angles as well as a short video to assess the property before making payments

Technologies Used: React and CSS.

Quiz App -- <https://quizappbycardinal.netlify.app/>

This is an open-source web application that focuses on providing an interactive quiz experience with the following features:

- Next and Previous Buttons.
- Timer with automatic submission if the timer runs out before submission.
- Submit Button for users who wish to submit their answers before the timer ends.

Technologies Used: HTML, CSS and JavaScript.

I contributed to the open-source community by making Quiz App freely available for others to use and improve upon.

Abinci -- <https://abinci-by-cardinal.netlify.app/>

Abinci is a highly interactive food website. It has all the functionalities of a modern ecommerce website including add-to-cart, checkout, cash and online payment sections and receipt printing amongst others.

Technologies Used: HTML, CSS and JavaScript.

Just-todo-it -- <https://just-todo-itt.netlify.app/>

Just-todo-it is a feature-rich web application for managing tasks. Created an interactive and seamless user experience using React, a JavaScript library for building user interfaces.

Technologies Used: React and CSS.

Education

FEDERAL UNIVERSITY OF TECHNOLOGY, OWERRI.
